DEVELOPMENT OF ONLINE FASHION SHOPPING WEBSITE

of the master graduate qualification work for the student of the group CE-229

Noor Razzak Abbas

Supervisor:
Cand. Sci., Assoc. Prof.
S.A. Ivanov

Chelyabinsk– 2019
RESEARCH GOAL AND OBJECTIVES

Goal:
The goal of the project is to develop website for shopping online. In order to attain this goal, we must solve the following objectives:

Objectives:
- To study the problem statement and make the Comparative analysis between ASP.NET and PHP;
- To develop the structure of the required database for the information website;
- To design the web-application;
- To implement the website;
- To test the system.
Functional requirements are product features or functions that developers must implement to enable users to accomplish their tasks. So, it’s important to make them clear both for the development team and the stakeholders. The features that are available for the administrator.

The features that are available for the administrator.

- CRUD Item.
- CRUD User.
- CRUD Order.
- CRUD Report.

The features that are available for the User (Customer).

- Make order.
- Make payment.
- CRUD Account.
